FOREWORD

This policy is contingent upon other existing policies that recognize the need for the University to serve its customers well and where possible ensure that deserving staff are resident within proximity of KyU. It is intended that housing provided is properly managed and regulated by invoking the necessary control tools.

The purpose of this policy is to establish and define processes and guidelines for the use of the University residential houses, vide ensuring consistent treatment of occupancy lease rates, utilities, general condition, appearance, repairs and maintenance of the units.
